Microsoft (Ms) Office Basics

Title	Microsoft (MS) Office Basics
Dates	17-8-2017 to 22-08-2017
Course code	PIMS/ADP/UG/17-18/S1001
Training out comes	To enable students to enhance practical knowledge in MS office
	The students will be able to claim proficiency in word, excel and Power Point.
	This provides valuable distinction in entering higher education and opportunity to develop skills for work readiness.
Resource person	Mr. Roopesh Kumar, HOD, Dept. of Computer Applications, PIMS Mr. Raju Krishna Kishore, Assistant Professor, Dept. of Computer Applications, PIMS

Modules

Course summary

The computer fundamentals soft skill course is a beginner course that was organized with the aim to develop basic computer literacy among the students. The course was designed towards enabling the students to learn the basic concepts of computer and basic knowledge of Word, Excel and PowerPoint. This course was targeted to provide the basics of MS-office application to prepare document, presentation and to learn the basic functions and formulas of excel, different charts in excel, how to prepare the PowerPoint slides and to understand the basics of animations.

Techniques in Biotechnology

Title	Techniques in Biotechnology
Dates	07-11-2017 to 11-11-2017
Course code	PIMS/ADP/PG/17-18/S1002
Training out comes	Impart the knowledge of biotechnology techniques in students
	Students will acquire hands on experience in biotechnology
	Students will be trained to apply their practical skills in troubleshooting the problems faced in molecular biology experiments
Resource person	Dr. Veeranna S., HOD, Dept. of Biochemistry, PIMS Dr. Sudipta Kumar Mohanty, HOD, Dept. of Biotechnology, PIMS Dr. Anuradha M., Principal, Dept. of Biotechnology, PIMS

Modules

S. No.	Course component	30 Hours
1	<p>DNA extraction</p> <p>Theory: DNA extraction- DNA, composition, different methods of DNA extraction (using CTAB, SDS, lysis buffer). Maintaining a sterile environment to obtain clean DNA, Sample collection (Plant, Animal, Microbes), Basic pre-requisites in a laboratory- to be kept ready before extracting DNA. Role of chemicals required for DNA extraction, Buffer preparation and major components of extraction buffer.</p> <p>Practical: DNA extraction from plant sample and checking the purity of DNA by spectrophotometry.</p>	10
2	<p>Polymerase Chain Reaction (PCR)</p> <p>Theory: PCR, history of PCR, steps involved in PCR, components of PCR, the role of PCR in molecular biology, troubleshooting the problems faced during PCR.</p> <p>Practical: Primer dilution, standardization of PCR primers by gradient PCR, standardization of PCR reaction, Performing PCR.</p>	10

3	<p>Agarose Gel Electrophoresis</p> <p>Theory: What is electrophoresis, agarose gel electrophoresis, role of different components of gel, standardization of the gel components in gel preparation, Role of gel buffer and tank buffer</p> <p>Practical: Basic pre-requisites in a laboratory- to be kept ready before gel preparation, agarose gel preparation, pouring the gel-on-gel plate, loading the sample on gel, running the gel, checking the bands on gel under UV illuminator.</p>	10

Course summary

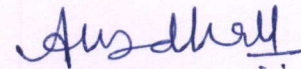

This course will emphasize molecular biology laboratory component to reflect the importance of training in biotechnology skills. This course helps in developing the basic laboratory techniques of a molecular biology lab. The skills learnt by students will make them to think confidently and independently while working in a lab. The basic concepts of DNA isolation, Gel electrophoresis, Polymerase Chain Reaction.

It helps students to develop critical thinking skills, encourages teamwork and accountability. It also helps them to practice accuracy in calculations, writing scientifically, developing multitasking skills. It encourages the students to take charge of their responsibilities associated while working in a company.

Course summary

The ability to speak before a group of people is a valuable asset as well as an important talent. Effective delivery and presence can help get a message across and influence an audience in memorable ways, equipping presenters with confidence that persists in every aspect of their work. Sales pitches, internal training and development programs, business development, corporate communication and plans, all require good presentation and public speaking skills. This course is an introduction to speech communication which emphasizes the practical skill of public speaking, including techniques to lessen speaker anxiety, and the use of visual aids to enhance speaker presentations. Civility and ethical speech-making are the foundations of this course. The course focused on methods to communicate confidently and competently to all types of audiences. With numerous job interviews, conference calls, meetings, product presentations, workshops, and public events, the importance of developing good presentation and public speaking skills is very crucial.

Course Summary

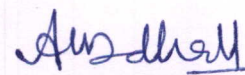

The Add on course conducted by Dr. Thammaiah. R.B., Dr. Indhu Eapen M. and Dr. Chethana P. dealt mainly on the basics of grammar starting from usage of words and phrases appropriate to frame meaningful sentences. The students were trained to speak, read, write and study in English with proper use of grammar. Students were made to learn grammar and vocabulary by different activities given to them like Quiz, paragraph writing, correcting the grammar and vocabulary mistakes in the given text and so on. This will help students to strengthen their ability to write their academic study tour report, industrial visit summaries, academic papers, essays and so on using the skills learnt through this course.

Functional grammar course helped students to enhance their writing and oral communication skills. Group discussions on some topics given and thinking of new idea creation for critical problems in daily life and so on was given to students to learn interpersonal communication and team work. This kind of tasks helped students to develop confidence. The students were trained to increase their reading speed and comprehend the academic study materials, text books and research articles.

Course summary

This course was conducted in view to provide knowledge to the students regarding the Intellectual Property Rights (IPR) and Bioethics.

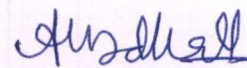

This course intends to provide an overview of various forms of patent rights. In a nutshell, the course has covered the philosophy, various technical and legal dimensions and implications of IPR for growth and development of science, along with the various socio-economic and ethics-legal consequences of IPR on economic development.

This also helps students to analyze importance of obtaining Patents, Copyright and Trademark. They also learn about the importance ethics in research, develop critical thinking skills and act ethically with respect to scientific research, practice and technology.
