Course summary

A communication skills and interpersonal skills training program typically aimed at improving the verbal and non-verbal communication skills, including effective listening, speaking, and presenting skills. This enhances the ability to effectively convey ideas, information, and messages to diverse audiences in a clear, concise, and convincing manner. This also makes students to understand body language and its impact on communication, and the ability to read and interpret non-verbal cues, build rapport, establish trust, and engage in active listening with others.

This course enhanced conflict resolution skills, including the ability to handle challenging conversations and negotiations effectively and also increased cultural awareness and sensitivity, including the ability to adapt communication style to accommodate different cultural norms and preferences. students improved ability to work effectively in teams, including the ability to communicate and collaborate with others, resolve conflicts, and achieve common goals. They also improved presentation skills, including the ability to design and deliver effective presentations, engage with the audience, and respond to questions at the end of the module.

Course summary

In a quality control course, the students are equipped with understanding of the importance and role of documentation in quality control processes and knowledge of various types of quality control documents and their uses. They are also taught to create, maintain, and update quality control documents accurately and effectively.

The students also understand the legal and regulatory requirements for quality control documentation and skills in using tools and software for managing and organizing quality control documentation. The aim of this course is to help learners understand how to effectively document quality control processes and how to use documentation to improve the overall quality of products and services.

GOOD LABORATORY PRACTICES (GLP) AND GOOD

MANUFACTURING PRACTICES (GMP)

Title	Good Laboratory Practice (GLP) and Good Manufacturing Practices (GMP)
Date	23-11-2020 TO 03-12-2020
Course Code	PIMS/ADP/PG/20-21/S1001
Resource Person	Dr. Ramgopal Rao S, Academic Manager, Biocon Academy Mr. Velumurugan Shanmugam, VP, Technical affairs, Biogenero Pvt Ltd Mrs. Subbalakshmi G Assistant Professor, Dept of Biochemistry, PIMS
Training Out Comes <ul style="list-style-type: none"> • Develop an understanding of the safe practice of basic laboratory procedures and protocols for future lab experience. • Develop skills to maintain and analyze laboratory data with accuracy. • Acquire knowledge regarding maintenance of laboratory records compliant with current industry standards. 	

Syllabus

Units	Course Components	30 Hour
1	GLP (Good Laboratory Practices) Introduction, history, scope and fundamental points of GLP (Resource characterization, rules, results, Quality Assurance) General Rules/Protocols for Lab Safety Measures Precaution and safety in handling of chemicals, laboratory tools, glassware and instruments; internal and external audit.	7
2	Standard Operating Procedures in Laboratories Logbook maintenance, basic SOPs for instrument handling and maintenance Calibration Of Instruments- PH Meter, Colorimeter, Spectrophotometer, Water Bath, Distillation Assembly, Burette and Pipette. Maintenance and analysis of Data Records	8

	Use of statistical and mathematical tools, result analysis and its interpretation.	
3	Guidelines for the manufacture of Herbal medicines Quality Assurance in the manufacture of herbal medicines; Good Manufacturing Practice for Herbal medicines; airlock, clean area, critical operation, cross-contamination; pipe work, light fittings, ventilation points and other services like sanitation and hygiene.	7
4	Production Control Contract production and analysis, self-inspection, personnel training, personal hygiene, premises, equipment, materials, documentation, batch number (or lot number), batch records. Process Control Understand intermediate products, master formulae, SOP; understand good practices in production, packaging, packaging material, qualification and good practices in quality control.	8

Course Summary

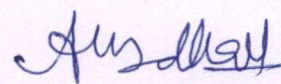

The learning outcomes for a Good Laboratory Practices (GLP) and Good Manufacturing Practices (GMP) training module typically include, understanding of GLP and GMP regulations and guidelines, including the relevant laws, policies, and best practices for laboratory and manufacturing operations and knowledge of the key principles of quality assurance, including documentation, record-keeping, and data management. Students understand the importance of standard operating procedures (SOPs) and the role they play in ensuring consistent and compliant practices in the laboratory and manufacturing environment. This course enhances familiarity with quality control and quality assurance techniques, including laboratory validation, product testing, and process monitoring.

They also understand risk assessment and management in laboratory and manufacturing environments, including the identification and mitigation of potential hazards and risks. They gain knowledge about the principles of good documentation practices, including the importance of accurate and complete records, data management, and report writing. They also understand the regulatory requirements for laboratory and manufacturing operations, including product registration, licensing, and certification. This helps in understanding of the importance of ongoing training and professional development for laboratory and manufacturing personnel, including the development of specialized skills and knowledge.

Course summary

This program helps students to improve their critical thinking skills. Students will develop the ability to analyze and evaluate problems from multiple perspectives and develop creative solutions and also will learn techniques to foster creativity and generate innovative ideas. This also helps students to enhance their problem- solving skills and improved decision-making.

Students also learn how to communicate ideas effectively and collaborate with others to solve problems and develop confidence in their ability to tackle complex problems and generate creative solutions. This program was aimed at equipping students with the skills and mindset needed to approach problems creatively, generate innovative solutions, and make effective decisions.

Course summary

This course was an immersive experience into Design Thinking - an empathy-based, human-centered, and rapid prototype-driven methodology for innovation. Design Thinking helped students to learn how to tackle challenges such as the creation of new products, technological innovation, services, business models, experiences, processes and/or systems. As a primary aim it was to empower students to ideate, launch, run, and successfully complete innovation projects that have a significant and meaningful impact on pioneering organizations and industries. The course encompassed intensive sessions on need finding, empathy, observation, immersion, ethnographic research, brain storming, ideation, and rapid prototyping - all in the context of tackling cutting-edge technological challenges and addressing strategic industry objectives.
